This letter confirms Open Systems International Inc. (OSI) USA has done the supply, design, engineering, installation, testing, and commissioning of the SCADA/DMS/OMS system for Consumers Energy for the monitoring and control of Consumer's electrical power distribution systems (46 KV). The supplied system includes the following components:

- Real-time data acquisition reporting from and interface of approximately (9,600) Remote Terminal Units (RTUs)
- SCADA Software – supporting alarm, tagging, trending, SOE, real time data acquisition & calculations.
- DMS software supporting load flow, loss minimization via feeder reconfiguration, FLISR, Volt-Var control, Switch Order Management (all in various stages of adoption)
- OMS software supporting Outage Management (for ~1.9 million customers), Outage Analysis & Prediction, Crew Management for unplanned work, field & Dispatching.
- Software functional redundancy for SCADA and ADMS functions

The OSI SCADA/ADMS system was successfully commissioned on June 5, 2022.

Sincerely,

Josh R. Hall
Executive Director of IT Electric at Consumers Energy
